HTML5 · CSS3 · Figma (UI Design)

Methodologies

Agile (Scrum/Kanban)

COURSES & CERTIFICATIONS

Full Stack Developer
IEL · 2024

Web Developer
Udemy · 2024

UI Design with Figma
Udemy · 2024

Programmer
Senac · 2024

Full Stack Developer
Digital College · 2022

PHP Developer & Magento
Digital College · 2022

CORE TECHNOLOGIES

C# / .NET • Blazor • Ruby on Rails • Angular • PostgreSQL • Docker

JOÃO MARCELO CARNEIRO DA SILVA

Full Stack Developer | .NET • Blazor • C# • Rails

PROFESSIONAL PROFILE

Full Stack Developer currently working with .NET, Blazor, and C#. Strong background in Ruby on Rails and MVC architecture, with hands-on experience in process automation and integrations using Make and Pipefy. Works across the entire stack, from data modeling to building responsive interfaces, delivering solutions for corporate and educational environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer – C# / Blazor | Unichristus
2026 – Present • Fortaleza, Brazil

- Develop and evolve web systems using C# within the .NET ecosystem.
- Build rich, responsive, and dynamic interfaces with Blazor.
- Work across the full development lifecycle, from data modeling to final user experience.
- Integrate solutions and optimize internal workflows for the educational environment.

Full Stack Development Intern | SEFIN – Fortaleza Finance Secretariat
2024 – 2026 • Fortaleza, Brazil

- Developed and maintained applications with Ruby on Rails following MVC architecture, integrated with an Angular front-end.
- Built interfaces following Material Design and MVVM architecture.
- Integrated REST APIs, managed version control with Git/GitLab, and used Docker.
- Worked with Oracle and PostgreSQL databases, fixing bugs and improving performance.

EDUCATION

Systems Analysis and Development | Faculdade Descomplica
Expected graduation: 2027 (2nd term)

High School Diploma | EEFM Doutor Cesar Cals

FEATURED PROJECT

University Pre-Enrollment Automation System
2026

- Built an end-to-end automated workflow for screening and mapping academic pre-enrollments.
- Hands-on experience with Make, implementing dynamic logic to segment students by current academic term.
- Worked with Pipefy, including API integration and GraphQL queries for creating and updating records.
